

Concentrated Lake Colorant

ECPD • ECPDBK • ECPDSB

Features

EasyPro's family of water treatment products is designed to work together to achieve the natural ecological balance your pond needs to maintain clean, clear water.

The use of fish safe dye is a common part of an overall pond maintenance program. Dyes may be poured directly into the pond/lake (preferably in several locations). Upon complete dispersal these dyes are non staining and are fish, pet and wildlife safe. Handle with care prior to dilution to prevent staining.

These concentrated dyes will save you in shipping costs

- One quart is equal to one gallon of other dyes on the market
- Helps to shade ponds and fish
- This is a nontoxic dye for use in ponds and lakes
- Waters can be used for swimming and irrigation once product is dispersed
- Compatible with most aquatic herbicides and algacides
- Black dye creates a dark reflective surface appearance while the blue dye creates "Caribbean" blue water, Serenity dye is a mix of the blue and black for a deep blue tint

Directions for Use

- This bottle will treat an entire surface acre up to 6 feet deep depending on color desired
- For best results add to multiple spots around the edges of the pond or use in conjunction with aeration
- Add additional dye as needed to maintain desired color due to dilution
- Will not stain fish, plants, wildlife or surfaces when used as directed and once dispersed
- Not for use in potable water sources
- Chlorinated water will cause fading, requiring higher dosages or more frequent treatments

CAUTION: Concentrated product may cause eye or skin irritation. Do not get in eyes, on skin or on clothing. Wear safety glasses or goggles and rubber gloves when handling. Do not taste or swallow from container. Concentrated product can stain fabric and other porous surfaces.

KEEP OUT OF REACH OF CHILDREN

Safe for fish & aquatic life

Sizes

Part #	Description	Size	Treats Up To
