

# PUMP STATION

## 140 GAL RIBBED POLY LIFT STATION TANK

### STRONG RIBBED POLY DESIGN

This 140 gallon polyethylene tank is designed to be directly buried outside of the home. This tank can be used for collection of wastewater that will then be pumped using a submersible sewage, effluent, or grinder pump.

### DEFAULT TANK DIMENSIONS

- 28" Diameter x 80" Tall
- 140 Gallon Capacity
- 4" inlet hole with rubber grommet seal
- 2" or 1-1/2" outlet PVC hub (based on pump size)
- 65" from tank bottom to bottom of inlet
- 15" from tank access lid to bottom of inlet
- 66" from tank bottom to bottom of outlet
- 14" from tank access lid to bottom of outlet

Custom Inlet & Outlet Configurations Available

### RISERS AND HEAVY DUTY COVERS AVAILABLE
